Portfolio site: <https://isaacmartin22.github.io>

Las Vegas, NV - Open to relocation

Education

Oregon State University	2021
Bachelor of Science, Computer Science. 3.68 GPA	

Work History

Associate Software Engineer at Widen	2021 - 2024
Software Engineer at Widen	2024 - 2026

Widen Enterprises | Digital Asset Management (DAM) SAAS company
Distributed Java + Typescript + React microservices system with 30+ apps/services

Accomplishments

- Eliminated a manual support workflow to improve customer experience by adding fullstack self-service functionality with safeguards and automated tests. (Java, Typescript + React)
- Reduced database load and increased user clarity by adding validation and snackbar messaging to a frontend app, reducing total frontend requests sent. (Typescript + React)
- Expanded coverage for public API and internal APIs/SDKs by adding Java Spring Boot endpoints and publishing the new endpoints in the app's SDK. (Java, Spring Boot)
- Eliminated unnecessary tripling of specific network requests by leveraging knowledge of frontend render cycles in React. (React, Typescript)
- Extracted functionality from a 25 year old monolithic application into new services and refactor functionality to be easier to extract. (Java, Spring, Apache Tapestry)
- Used SQL knowledge to improve performance for several database queries. (SQL, Hibernate)
- Resolved thousands of defects across the collection of applications and services (All)

Open Source Contributions	2026
- Hiring-agent - QoL addition - Python pipeline for AI evaluation of resumes - Lichess - Frontend bugfix - Typescript/Scala community driven chess website (HTML, CSS)	

Personal Projects	2026
- Portfolio website containing my open source applications and services - Features - server sent events, user analytic persistence, AI RAG portfolio chatbot - Backend Java REST API and SDK with PostgreSQL database CRUD SQL operations - Integrations with project CI/CD and Deployment pipelines for visibility	

Skills

Languages: Java, Typescript, Javascript, C++, Python, Rust, HTML, CSS, SQL, NoSQL

Frameworks: Spring, Spring Boot, React, Hibernate, Apache Tapestry

Testing: Playwright, Spock, Groovy, JUnit

CI/Deployment: Buildkite, Docker, Kubernetes, Maven, JFrog, Stormforge

Cloud: AWS SQS, AWS S3, AWS Kinesis, DynamoDB, MongoDB, PostgreSQL, MySQL

Misc: Sumologic, Datadog, Grafana, Snowflake, Integrations, RAG, Vector Databases, AI
